

Pet Care Center At Luna Park

HAPPY NEW YEAR!

Weight and how it affects our Pets:

In the U.S., 59% of dogs and 61% of cats were classified as overweight or have obesity in 2022.

Common weight-related disorders in dogs include:

- *Osteoarthritis, cruciate ligament injuries, strains, sprains, and decreased mobility.
- *Luxating patella (knee dislocation) due to cartilage damage
- *Diabetes and other metabolic & endocrine disorders
- *Respiratory disease
- *High blood pressure
- *Kidney disease
- *Chronic inflammation
- *Certain cancers

If you're concerned about your pets weight have your dog examined by a veterinarian before beginning a weight loss program.

New Year

New year's celebrations can sometimes be rough for our furry friends. Make sure your pet has access to quiet areas during the festivities and refill any calming medications if you're running low.

Employee of the Month

Sponsored by our friends at Purina:

Congratulations Ash!!! Ash has been an amazing addition to the Pet Care Center team and is always a joy to work with.
