5 Symptoms of Dehydration:

1. **Appetite Loss:** *Dehydration dulls the digestive system, resulting in loss of appetite.*
2. **Panting:** *A lack of water in the system drains the energy and results in vicarious panting.*
3. **Loss of skin elasticity:** *The skin and fur lose their shine and elasticity due to a lack of hydration.*
4. **Dry nose and gums:** *Dehydration deprives the pets of their habit of consistent salivation.*
5. **Lethargy:** *Dehydration leads to a pathological state of unresponsiveness and sleepiness.*

Leaving your pet in the car can be extremely unsafe.

On a warm day the temperature in a car can exceed 120° in a matter of minutes—even with the windows partially open.

Prevent a possible emergency like brain damage, heatstroke, or suffocation by choosing to leave your pet at home or taking them only to locations that allow pets in the building.

Hours of Operation

Mon- Fri 8am-6pm

Closed Saturday and Sunday
